DATE OF INFO

SUPPLEMENT TO  
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED. HOWEVER, INFORMATION CONTAINED IN BODY OF THE FORM MAY BE UTILIZED AS DEEMED NECESSARY BY THE RECEIVING AGENCY.

THIS IS UNEVALUATED INFORMATION FOR THE RESEARCH  
USE OF TRAINED INTELLIGENCE ANALYSTS

50X1-HUM

Kamenjak Area

1. The defenses in the Kamenjak area consist of a fortified zone lying roughly between the following limits:
  - (a) A line north and south through the west boundary of Grobnik airfield
  - (b) A line north and south through Kamenjak
  - (c) A line east and west through Mount Orni
  - (d) A line east and west through Mount Malahost (sic)
2. Pill-box sites have been dug into the rock at tactically favorable points. Pill-boxes are covered with a meter thick layer of concrete and have been well camouflaged. Each pill-box accommodates two machine guns and is surrounded by two concentric barbed-wire entanglements, the outer about 50 centimeters in height hidden in the undergrowth about 50 meters from the pill-box and the inner one much thicker and supported on small saltings close up to the pill-box.

Boka Kotorska Area

3. The precise nature of work in progress is not known, but occasional heavy consignments of cement, iron bars for reinforced concrete and rectangular cast-iron frames have been observed entering the area by road as well as by sea.

Losingj Island

4. Fort Nazario Samro is situated on the central isthmus of Losingj Island above Bocca Vera Bay, and dominates the sea channels to the east and west.
5. The fort has six heavy guns. Three have been laid towards Susak Island and three towards Punta Croce on the southern extremity of Cres Island.
6. In Bocca Vera Bay there is a mole on which supplies are unloaded and fed to the port by means of a funicular railway which is hauled up by an electric windlass installed within the fort perimeter.

50X1-HUM

7. Five or six small buildings situated immediately west and below the fort have been reconditioned and now garrison about 350 men.
8. The area consisting of the fort and barracks has been surrounded by a barbed-wire fence and all the waste ground within this perimeter is planted with young trees. The waste ground was mined by the Germans and as yet has not been cleared.
9. The main entrance to the fort perimeter is situated near the mole referred to above.
10. There is an AA Battery emplaced on a former Italian site on a hill one mile south of Fort Nazario Sauro. The emplacement is in the center of a mined and wired-off area. The number and type of guns are unknown. Target practice is frequent.
11. A former Italian AA Battery site behind the Church of the Annunciation at Port Cigale is now being repaired by Yugoslav pioneer troops. No guns, however, have yet been emplaced.
